# Bahama

Founded in 1950 today Bahama designs and manufactures a great variety of high-quality large-size parasols and sun sails. National and International customers alike trust in our industrial technology and accurate workmanship. The premium products from Bahama characteristically stand for technical attributes like compactness, durability and wind stability but also for aesthetical features like beautiful designs and materials.

»Made in Germany« – our full range production facility manufactures nearly all parts in house. Bahama further processes sustainable and environmentally friendly materials according to the OEKO-TEX 100 standard, Class 1. The combination of high-quality materials and the structural features allows Bahama to guarantee wind stability for its products, depending on the model, of up to 130 km/h.

**And most importantly:** we love customer service – from consulting to installation, from cleaning to winter storage and maintenance.

**Discover the possibilities of an extended outdoor season.  
No matter what the weather. Just get to know us!**

reddot design award  
winner 2019

## The Easy wins the Red Dot Award 2019.

The Red Dot stands for great designs since the 1950s. The independent international jury of experts awarded the coveted quality label among more than 6,000 submissions from over 50 countries.

On one leg...

## The Heart of it All

Easy is our entry-level model. This large-size parasol has an excellent price-to-performance ratio while meeting the high demands of a professional large sized parasol. This is attractive for both commercial as well as private customers.

- ✿ Low price despite professional features
- ✿ Easy to use
- ✿ An elegant lightweight with a long, durable life span
- ✿ Modern, high-quality aluminum finish
- ✿ Telescopic opening and closing for increased ground clearance
- ✿ No loose functional parts like ropes, cranks or connectors
- ✿ Quick handling with the single-lever closing mechanism
- ✿ Maintenance-free, fast spare parts delivery
- ✿ Smaller slider ring for using at a table
- ✿ Anti-opening protection
- ✿ Optimal fabric tension with the help of one handle
- ✿ Two different, high-quality grades of textile fabric
- ✿ New contemporary selection of colors
- ✿ Ideal for short periods of use, frequently changing locations; rental service
- ✿ Optionally available with theft protection

# BAHAMA®

# Product Information

## 1 Textile Membranes

No matter your choice of fabric, the resulting textile membranes combine all the attributes of a durable and sustainable product. These include next to the high-quality appearance numerous technical functions.

### 1.1 Brand Name: betex®05 Fabric exclusively crafted for Bahama

100% polyester fabric with top transparent coating
Grammage of approx. 200 g/m²
Excellent UV-protection UPF 50+ protects against UV radiation (exception: snow 9577)
High degree of fabric lightfastness (i.e. fading) (DIN EN ISO 105- B02 Class ≥ 6–7)
High waterproofness, pressure resistance (DIN EN 20811, ISO 811   Water column ≥ 100 mbar, 1.000 mm)
High temperature resistance (DIN 53361 from -30°/+90°C)
Excellent friction resistance (DIN EN ISO 105-x12   Class ≥ 4–5)
Sustainable and environmentally friendly fabrics with the OEKO-TEX 100 Standard, Class 1
Exchangeable and washable one-piece membranes
25 contemporary colors   special colors upon request

### 1.2 Brand Name: swela Outguard 393

100% polyester fabric with top transparent coating
Grammage of approx. 190 g/m²
Excellent UV-protection UPF 50+ protects against harmful UV radiation
High degree of fabric lightfastness (i.e. fading) (DIN EN ISO 105-B02 Class ≥ 6–7)
High waterproofness, pressure resistance (DIN EN 20811, ISO 811   Water column > 200 mbar, 2.000 mm)
Excellent friction resistance (DIN EN ISO 105-x12   Class ≥ 4–5)
Sustainable and environmentally friendly fabrics with the OEKO-TEX 100 Standard, Class 4
Exchangeable and washable one-piece membranes
15 contemporary colors according to the color chart for swela Outguard 393

## 2 Umbrella Frame

The difference may not be obvious at first sight: but the large-size parasols from Bahama have an inner and an outer pole that optically come together to form one. Better sturdiness also means better stability and the corresponding safety.

### Center Pole with Outer and Inner Pole

Outer Pole
Especially stable due to the extruded aluminum hollow profile AI F25
Pole diameter approx. 57 mm
Wall thickness approx. 2.45 mm
Naturally anodized
Including anti-opening protection (picture 2.1 and 2.2)

### Inner Pole

Extruded aluminum hollow profile AI F22
Wall thickness approx. 2 mm
Outer diameter approx. 48 mm
Naturally anodized

### Spokes, Support Spokes, Bearings and Hinges

The quality of a parasol can only be as good as its supporting and connecting parts

Natural polished finish
Wall thickness approx. 1.2 mm
Welded aluminum hollow profile with special alloy AI F30/32; no sharp edges
Individually replaceable spokes and support spokes

# Product Information

### 3 Installation Options

Both mobile or permanent options are available. All Bahama installation options will adequately secure the parasol.

#### 3.1. Mobile Installation Options

##### I. Cross-Frame

For 8 standard flagstones (400 × 400 × 50 mm | approx. 17.4 kg/ea.), 8 flagstones are recommended; one layer with 4 flagstones possible

Available with or without flagstones

Welded, hot-dip galvanized steel frame (weight: approx. 16 kg)

Height adjustability in all 4 corners

Quick assembly and disassembly

#### 3.2. Permanent Installation Options

##### I. 2-Piece In-Ground Sleeve

Sleeve to be set in concrete

Above-ground connecting component

Welded steel

Hot-dip galvanized

Weight: approx. 4 kg

##### II. Steel Plate with Sleeve

Square, galvanized steel plate

Size of plate: 750 × 750 × 8 mm

For bolting onto massive stone or wood surfaces

Bolts/dowels not included

Weight: approx. 37 kg

3.1.I

3.2.I

3.2.II

# Additional Features

### 1 Valance

The valance is hemmed, dyed in the matching color and the edgelines are thermally processed. No ruffles here.

Valance height approx. 30 cm

Additional advertising space

### 2 Printing

The Bahama UV printer uses 9 color channels. Even pure white. Only lightfast and highest quality inks are used to ensure color accurate fonts, logos and emblems are positioned with millimeter precision.

No fading due to highly UV-resistant colors

Optimal advertising impact

# Additional Features

## 3 Protective Cover

Not only does it keep everything together, it also keeps it clean. Film packaging is often not enough protection. To this end there is the protective cover basic.

Light weather protection cover

Tent fabric | Nicotarp with lacing

Especially suited for winter or long-term storage

## 4 Theft Protection

You wouldn't park your high-end bicycle without locking it up first, right? Protect your parasol from theft with a lock that is incorporated in the installation option.

Solid aluminum

Cylindrical lock with 2 keys

Naturally anodized

Easy to use

## 5 Transport Packaging (included in the price)

The parasols leave our production facility in perfect condition. To ensure they arrive in perfect condition they are delivered in a hard-cardboard cylinder tube.

Outer diameter approx. 308 mm

Cylinder length approx. 3,600 to 4,180 mm (depending on model); weight approx. 12 kg

Transport weight including parasol depending on shape and size approx. 27-37 kg

# Handling

Opening and closing is quick and easy.

## OPENING

- Take off the safety strap and press a spoke to the center pole, release the spring buckle from the above slider ring.
- Lift the ends of the spokes until the parasol opens by itself.
- Attention: the handle must be pressed down vertically onto the pole (passive position, picture 1).
- Latch in the spring buckle and press the handle down.

## CLOSING

- Lift handle up and unlatch the spring buckle (picture 2).
- Press the handle down on the center pole (passive position).
- Push the slider ring up, pull in the spokes until the spring buckle latches onto the slider ring.
- Latch on the anti-opening protection (picture 3).
- Pull the tips of the fabric to the outside of the closed parasol and spirally wrap them around the center pole (picture 4). Then wrap the safety strap around the parasol (picture 5).

The excellent appearance and the technical features of the textile membrane can be maintained by adhering to the following closing procedures:

Always pull the tips of the fabric to the outside of a closed parasol

Do not store the parasol with any fabric stuck between the spokes and support spokes

Spirally wrap the fabric around the center pole

Wrap the safety strap around the parasol to secure the fabric.

# Good to know

## Sustainability and Environmental Compatibility

The »betex®05« fabric, exclusively crafted for Bahama, and the resulting textile membrane are certified exclusively according to the OEKO-TEX 100 standard, Class 1 which is awarded by independent institutions. Class 1 meets the demands of baby clothing with skin contact.

The OEKO-TEX pollutant test corresponds to the respective intended use of the textiles and materials. In Germany there are clear and reliable criteria for environmental compatibility and sustainability. Bahama demands of its products that every defect or damaged part can be replaced.

## Made in Germany

Bahama's customers always refer back to the great importance of our German production facilities. »Made in Germany« is still a unique selling point and a reason to buy. Bahama's full range production facility is located in Germany.

The combination of the highest quality materials and structural features allows Bahama to guarantee the wind stability of its products, depending on the model, up to 130 km/h. In addition to the technical details of the parasol structure, it is the decisiveness of the textile membranes' color to light-fastness, waterproof material, weight and water column that make each Bahama parasol the highest quality in its class. Trust is placed in Bahama by luxury hotels such as the Burj Al Arab in Dubai, the Hotel Sacher in Vienna and the Dalí Museum in St. Petersburg, USA.

## Service

Service greatly influences the life span of a parasol. The exchangeable textile membrane of a Bahama parasol can – after being exposed to all sorts of weather conditions for years – be cleaned or replaced. Our service makes a full technical and general overhaul of the product such that they not only look attractive, but can defy the strongest of winds.

No matter where you need Bahama's service, the Bahama team or one of our expert partners will be glad to help - worldwide.

Careful and individual planning

Installation of new parasols

Fitting of new textile membranes

Complete service i.e. assembling and disassembling the large-size parasols, washing, cleaning and maintenance of the frame and textile membranes

Membrane service, i.e. fitting and removing the textile membrane, cleaning and repairing

Storage of the returned and serviced large-size parasols and/or textile membranes.

Technical trainings

## UV-Protection

Analogous to the sun protection factor/SPF all textiles are labeled with the ultraviolet protection factor/UPF. Built into the fabric it protects against hazardous UV radiation. Bahama uses the fabric brand betex®05 for the production of its parasol textile membranes. This material fulfills the requirements for UPF 50+, which indicates an »excellent« dermatological UV protection factor and allows less than one fiftieth (<2%) of the UV radiation through the textile membrane onto the skin.
