

**Future!** This is how we here at Bahama rung in the year 2017.

newsletter page 1  
December 2017

Now, we are literally setting **sail** and have expanded our product range to include the high-end Shade Sails from the innovative brand **C4sun**.

They put everything else in the shade.

**Set new accents**

**Innovative:** C4sun Shade Sails are the first worldwide to offer fully automatic furling and unfurling shade and sun sails with their unique wind-pressure-relief system.

- \* The C4sun system's exceptional design and extravagant look are especially appealing. The **highly elastic piping profiles** automatically curve upwards creating a complete new sense of space.
- \* At the same time the arched sail **defies every type of weather**: wind is easily absorbed, and rain water runs off to the sides with no chance to pool and create unpleasant water pockets.

**High Quality:** C4sun Shade Sails fulfill the highest quality requirements for »Made in Germany«. Just as you would expect from Bahama!

- \* Thanks to their unique arched shape and especially developed **wind-pressure-relief system**, excessive wind pressure is not a problem.
- \* Top-of-the-line and extremely weatherproof materials combined with proven technology and the exceptionally sturdy overall design reduce care and maintenance costs to a minimum.
- \* The high-grade drive and control systems from the global market leaders at **Somfy** guarantee reliable and long-lasting ease of use

## Set new accents

December 2017

**Handcrafted:** Every C4sun Shade Sail System up to 6.80 m x 6.80 m is one-of-a-kind and custom-made to meet the demands of each individual customer.

- ✿ Thanks to individual planning the Shade Sails harmonize perfectly with every overall design concept and fit in nearly every installation environment.

**Flexible:** C4sun Shade Sail Systems combine their elegance and grace of design with maximal flexibility and stability in use.

- ✿ Whether singular or dual shade systems: you can comfortably control how much shade you prefer using your **remote control**. Each sail can be unfurled as far out as you desire.

**Award-Winning:** Exceptionally exciting high-end design quality!

- ✿ The C4sun product range elips4sun won the coveted **Red Dot Award** »Best of the Best« in 2014.
- ✿ The renown R+T **Innovation Prize** »Special Prize Design« then followed in 2015,

# BAHAMA®
