

Safety first

Info No. 4
March 2020

Providing mutual protection!

Infection protection for all situations – made by Bahama

The flexible polyglass window **protects people** who have face-to-face contact with customers, colleagues, patients, etc. Light and therefore easy to assemble.

- * for counters as used, eg. in medical practices, pharmacies or in retail stores such as bakeries, butchers
- * for tables, e.g. at authority offices, sampling sites
- * for conveyor belts at cashier desks, delivery services, production facilities

The 0.5 mm polyglass is combined with textile fabric including hemstitches at the top and bottom. The panel is stabilized by aluminum rods that are inserted into the hemstitches. The system convinces through fast handling, assembly and disassembly – it's fixed via eyelets and snap hooks.

Individual fastening | upwards and downwards anchoring

max. width 1,320 mm (per panel)
height 1,360 mm (individual dims possible)
weight 1,750 g

Price: 159 € excl. VAT
